### 3. HAZARDS IDENTIFICATION

Dangerous for the ozone layer. Rapid evaporation of the liquid may cause frostbite. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.

4. FIRST AID MEASURES	
General advice	: If unconscious place in recovery position and seek medical advice. Never give anything by mouth to an unconscious person. If breathing is irregular or stopped, administer artificial respiration. If symptoms persist, call a physician.
Inhalation	: Move to fresh air. Keep patient warm and at rest. Artificial respiration and/or oxygen may be necessary.
Skin contact	: Wash off with warm water. Take off all contaminated clothing immediately.
Eye contact	: Rinse thoroughly with plenty of water, also under the eyelids. Consult a physician.
