Recovering R-22 and returning it to an EPA certified reclaimer is good business. R-22 can be recovered, reclaimed and reused repeatedly, ensuring a long-term stable supply.

Recovering R-22, to prevent atmospheric release, is the law.

<https://www.epa.gov/section608/stationaryrefrigeration-service-practice-requirements>

Using R-22 delivers the highest efficiency and capacity for existing units and results in the shortest service time for the technician.

BOTTOM LINE? R-22 IS LEGAL, AVAILABLE, AFFORDABLE.
