

HUDSON RECLAIM IMPACT

Hudson is here to help make responsible choices in refrigeration and air conditioning, while working towards creating a more sustainable world.

Every pound of reclaimed refrigerant sold avoids the environmental impact of new refrigerant production. Since inception, Hudson has reclaimed more than 72 million pounds of refrigerant or 84 million tons of CO2 equivalent GHG emissions. This can be expressed as the equivalent to:

18,692,543

Cars Taken Off The Road

10,217,982,288,853

Smartphones Charged

1,388,947,222
